

Sewing Kit

Introduction

This Felt Toy unit will teach your class about how to write their own design criteria.

They will design products with the user in mind

thinking about aesthetics and function.

Annotated designs will be used to communicate ideas as well as step by step plans. Students will learn how to make a paper template and how to sew a running stitch, backstitch and blanket stitch. Finally, when they have made their felt toy, students will learn how to write a detailed evaluation.

Can you list the equipment you will need?
